### **County of Bernalillo, New Mexico Goes Live with Public Sector Solutions end to end Financial Management Suite.**

Public Sector Solutions has met Bernalillo County's requirements in providing a system that is "user friendly" and easy to learn and a software solution that includes encumbrance accounting and fund accounting logic. Our implementation team worked closely with the County Project team to satisfy all of the County requirements and deploy within a tight budget.

Our Financial Management Suite provided the city with much needed detailed Reporting capability with Drill Down functionality and a Financial Management Suite that was easy to learn. Our tightly integrated set of applications eliminated the need for dual data entry and a set of new interfaces will access data from existing applications used by other departments.

We look forward to continuing our close partnership with the County of Bernalillo Department of Public Works for further benefits in accessing data and allowing for access to data as we integrate disparate systems used by other departments and vendors.

### **Clark County, LAS VEGAS Goes Live with Public-Sector Solutions**

Public Sector Solutions has completed implementation of its Financial ERP solution for Clark County, Las Vegas on time and within budget as promised. Public-Sector Solutions worked together with CCHD to quickly provide interfaces with existing applications and is looking to provide additional functionality as the AR module is deployed at POS locations across the county.

Public-Sector Solutions met the project goals of Clark County Health District by:

- Establishing a long term, professional vendor partnership to ensure system stability and continued innovation.
- Increasing customer service and satisfaction level by providing a faster, more accurate and readily available (i.e. access via an Intranet) information retrieval process.
- Increasing management control and accountability by providing more accurate and up-to-date data to other departments, management and the public.
- Having the ability to produce management/staff reports and communications in an efficient manner.
- Improving productivity and coordination of operations between teams.
- Implemented a full encumbrance fund accounting software suite.

## 2004 leading Research Center successful deployment

Fox Chase Cancer Center in Philadelphia, PA goes live with Public Sector Solutions.

One of the nation's first comprehensive cancer centers designated by the [National Cancer Institute](#) in 1974, Fox Chase conducts basic and clinical research; programs of prevention, detection and treatment of cancer; and community outreach.

Once again PSS has proven its adaptability in meeting the high transaction usage of this busy research Institute:

- Adaptable implementation to suit client schedule
- Integration with existing software
- Custom enhancement to System Modules
- Training and Support

Public Sector Solutions offerings are ideally suited for busy research laboratories like the **FCCC** as we are tightly integrated with the Microsoft platform and provide custom enhancements to our suite of software that allows for ease of use while the MS look and feel is intuitive and standardized whereby flattening the learning curve associated with any new application. We continue to maintain our edge by meeting/exceeding our client's use requirements and being cheaper, faster and easier in the process.
